Databases: MySQL, PostgreSQL, MongoDB, Azure CosmosDB, Redis

Tools: PyCharm, Visual Studio Code, Git, Linux, Postman, Docker, AWS

Education

Magadh University

2020 – 2023

Bachelor of Computer Applications

Percentage: 71%

Experience

Software Engineer

Noida, India

Befisc

Nov 2024 – Current

- Working as a Backend Developer, primarily focusing on API development, integrating with AWS services such as Lambda, API Gateway, and EventBridge.
- Build and optimize web scraping solutions for data extraction and automation.
- Work with MongoDB to handle and store logs of our APIs, ensuring efficient monitoring and analysis.

Software Engineer

Mohali, India

Creative Buffer

Aug 2023 – Oct 2024

- Worked on multiple Python and Django-based web application development projects as a full-stack developer, handling both frontend and backend requirements.
- Implemented in-depth concepts of Django and Django Rest Framework, developed with Django templates, HTML, CSS, JavaScript, and JavaScript libraries like React.js.
- Worked on the creation of REST APIs with Django Rest Framework. I have implemented Django Forms, templates, models, Views, signals, url routing etc in Django. Also implemented Api View, Viewset,serializers, Generic views, permissions and routers in Django rest framework.
- Deployed a Django project on a VPS, configured the application server with Gunicorn and the web server with Nginx, and mapped it to the domain.
- Collaborated with a distributed remote team for the VEGA APP project, worked with Redis and AWS OpenSearch for enhanced data handling and search functionalities.

Django Developer Intern

Remote

Jugadu.in

July 2022 – Aug 2022

- Worked on the development of a RESTful APIs using Django and Django REST Framework (DRF) for a freelance marketplace website for artists.
- Implemented user authentication, order management, and payment system integration, leveraging DRF features such as API views and JWT authentication.
- Collaborated with a frontend developer for smooth integration of APIs and to ensure a seamless user experience across both frontend and backend.

Django Developer Intern

Easy Techs

Remote

Feb 2022 – Jun 2022

- Worked on an asset management website for a firm managing clients' money and assets, including mutual funds and property investments.
- Utilized Django features such as views, models, URLs, and middlewares, gaining hands-on experience in scalable and maintainable web applications.

Projects

Ytclass

[Github](#) 

- Built a website that converts YouTube playlists into structured, trackable courses for learners.
- Tech Stack: Python, Django, YouTube API, PostgreSQL, VPS

Devblogs

[Github](#) 

- Built a dev.to clone that incorporates most of its features like user authentication, blog-posting, commenting, etc.
- Tech Stack: Python, Django, DRF, PostgreSQL, ReactJs, Axios.

Types-tales

[Github](#) 

- Built a text-based, microblogging website where users can share stories in up to 500 characters.
- Tech Stack: JavaScript, Express.js, Nodejs, MongoDB, Reactjs, Tailwind

Awards and Accolades
